U35 CLOTHING LABEL PRESS

■ Machine Specifications

- Assembled: USA
- Weight: Approx. 25 lbs.
- Platen Size: 3 x 5 inches

■ Machine Advantages

- Standardize Application: Easily apply every Clothing Label with standardized temperature, time, and pressure
- Very Portable: The small machine design gives you the ability to quickly change work-spaces. After use, it can be easily stowed away.
- Timer: Automatically counts down your cycle time, and buzzes when complete (heated platen is manually released).
- Temperature Control: Digital & adjustable temperature control.
- Heated Platen: Covered with glass cloth for non-stick Clothing Label application and easy Cleaning

WARRANTY AND IMPORTANT NOTES

- Warranty: The system comes with a 3 year, no-hassle replacement guarantee on equipment. If your equipment breaks, it will either be fixed or replaced. The associated shipping costs will even be covered. Limitations: for each piece of equipment purchased, the replacement guarantee can be used on time. After using the replacement guarantee, there may be a charge for service/repairs/shipping.
- Important Notes: Iron On Clothing Labels are designed to withstand laundering. However, the end user should test these labels with their specific laundering method. We do not guarantee the success of this product in every laundering environment. Wash testing is the responsibility of the end user. We will gladly send Clothing Label samples upon request. In most cases, samples are sent with every quotation for new customers.
